TECHNOLOGY

©

SNAPSEAL™ TECHNOLOGY

SNAPSEAL™ technology works in a unique way. Pushing SNAPSEAL™ button upwards will allow drinking, pushing it downwards will close the mug. This has the advantage that only one hand is needed to open and close the drinking mug. The technology guarantees a leak proof drinking experience and keeps drinks at the correct temperature. Drinking mugs equipped with SNAPSEAL™ have a seal with soft grip, a leak proof lid and a special reservoir to sip hot drinks from. The drinking mug can be easily cleaned by pushing the handle upwards.

Hot/cold does not escape from the drink hole.

Dishwasher safe.

One-handed operation to open, drink and close.

HOW IT WORKS

Pushing the SNAPSEAL™ button upwards will allow drinking, pushing it downwards will close the mug.

Soft closure grib.

Easy to clean lid.

One-piece, leak proof lid.

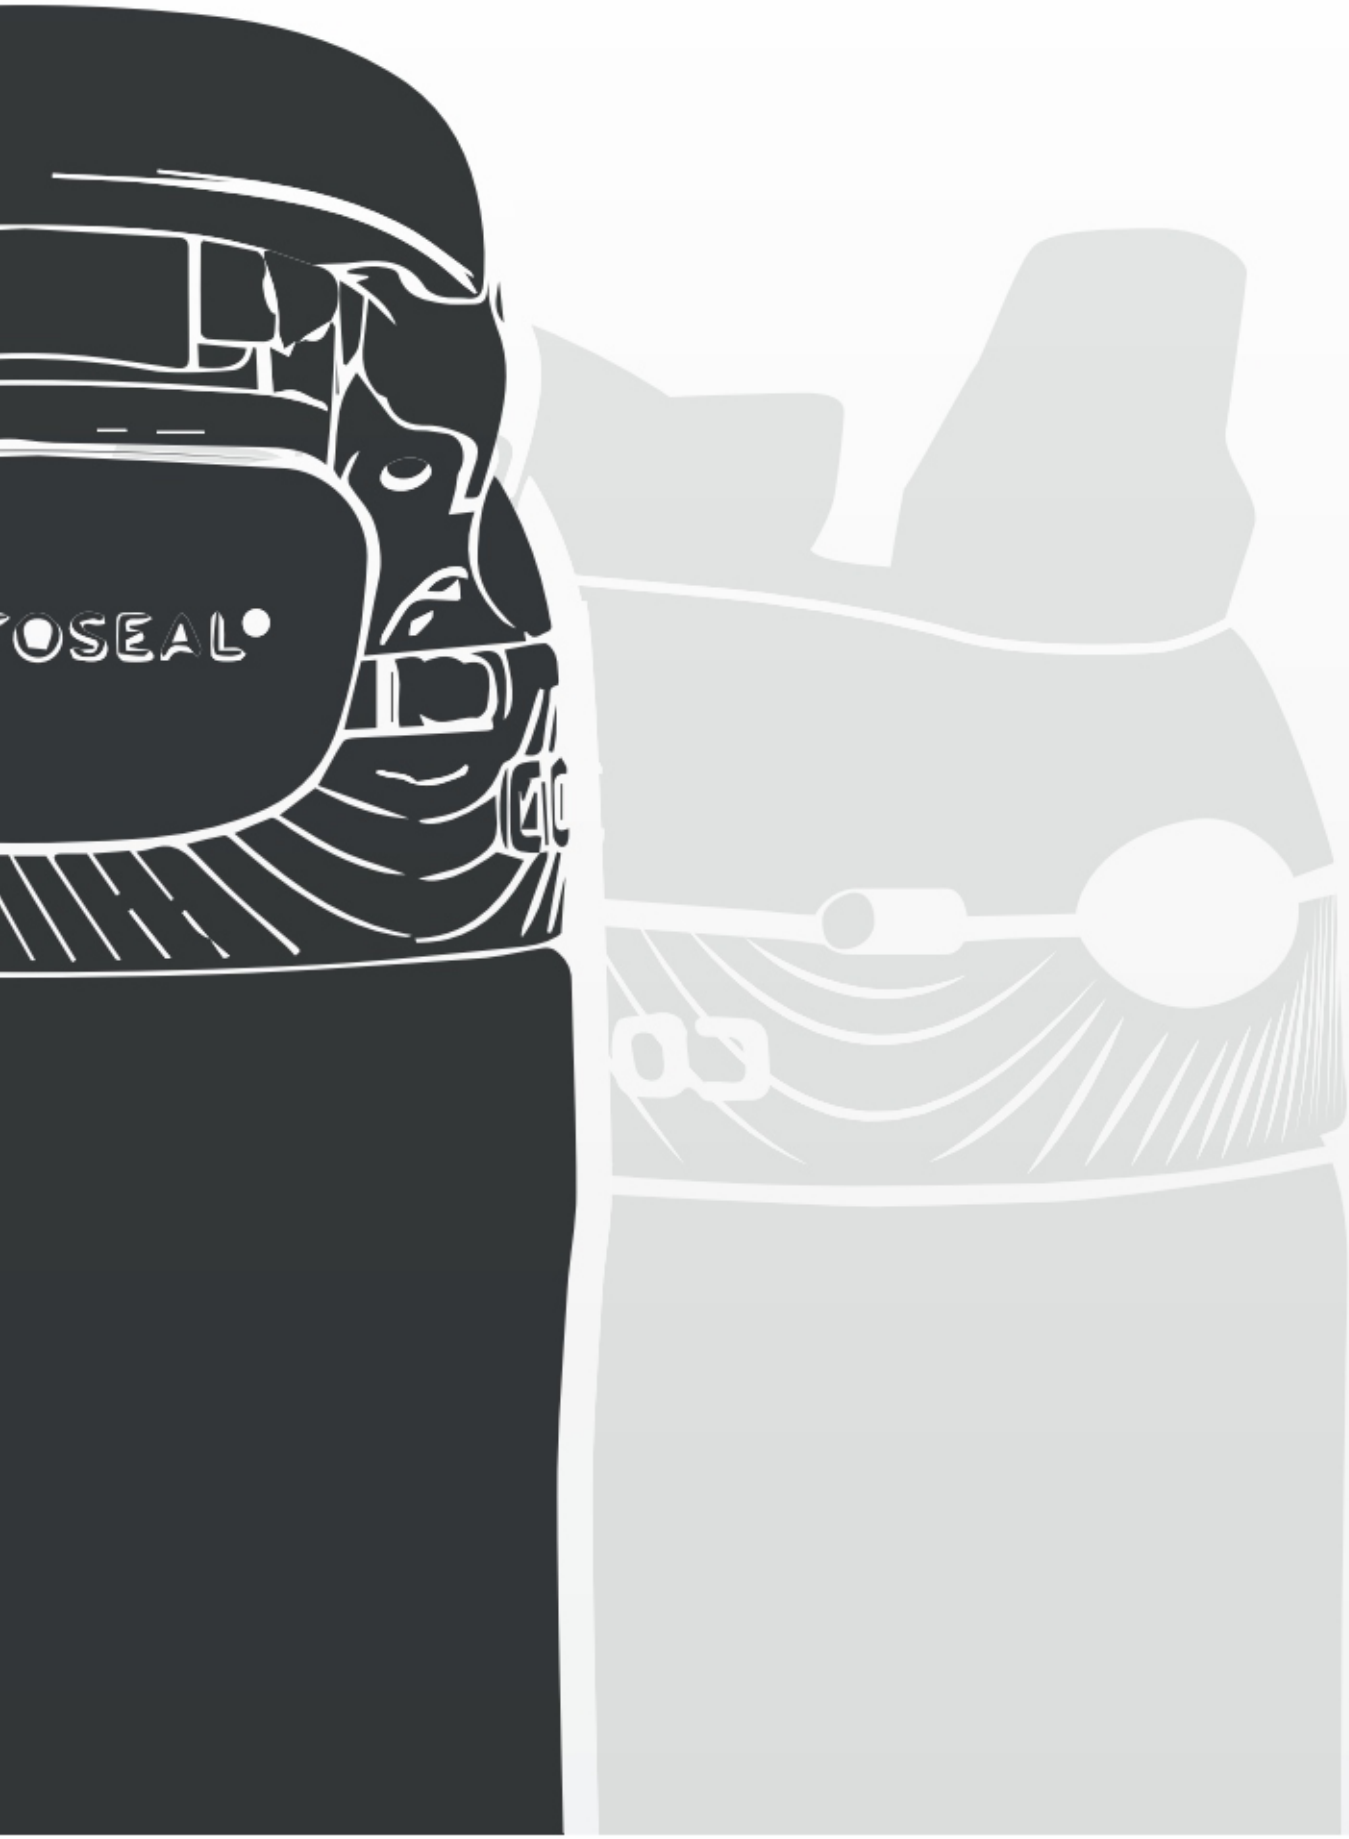

Example as used in Byron
